WEEKLY RETURNS OF BIRTHS AND DEATHS FOR THE PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 1 Vol. LXXXX. WEEK ENDED SATURDAY, 3rd JANUARY, 1953. PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 416—207 boys and 209 girls, while the number of births to mothers normally resident in the County Borough was 323.

The number of deaths registered was 203—101 males and 102 females. The number of deaths of persons resident in the County Borough was 155.

Tuberculosis caused 6 deaths, 2 of which were from tuberculosis of the respiratory system, one from tuberculous meningitis, one from tuberculous peritonitis, one from tuberculosis of the spine and one from tuberculosis of the wrist.

Twelve deaths were due to malignant neoplasms.

There were 9 deaths from bronchitis, 8 from pneumonia and 2 from influenza.

There were 3 accidental deaths registered, one of which was from a transport accident.

Among the deaths of infants under one year, 3 were due to atelectasis, 2 to pneumonia, 2 to prematurity, one to abscess of thymus gland, one to congenital malformation, one to acute pulmonary congestion, one to rickets and one to bronchitis.

Twelve of the deaths recorded during the week for the County Borough were those of children under one year of age, 6 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 89.

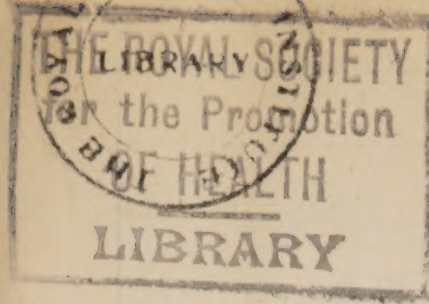

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 3rdrd January, 1953, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 2 Vol. LXXXX. WEEK ENDED SATURDAY, 10th JANUARY, 1953. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 361—181 boys and 180 girls, while the number of births to mothers normally resident in the County Borough was 282.

The number of deaths registered was 167—101 males and 66 females. The number of deaths of persons resident in the County Borough was 145.

Tuberculosis caused 5 deaths, 4 of which were from tuberculosis of the respiratory system and one from tuberculous meningitis.

Twenty-five deaths were due to malignant neoplasms.

There were 16 deaths from bronchitis and 8 from pneumonia.

There were 3 accidental deaths registered, one of which was from a transport accident.

There was one suicide.

Among the deaths of infants under one year, one was due to measles, one to gastro-enteritis, 2 to pneumonia, 2 to prematurity, 3 to congenital malformation, one to birth injury and one to burns.

Eleven of the deaths recorded during the week for the County Borough were those of children under one year of age, 6 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 90.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 10th January, 1953, for the Principa Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 3 Vol. LXXX. WEEK ENDED SATURDAY, 16th JANUARY, 1953. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 321—171 boys and 150 girls, while the number of births to mothers normally resident in the County Borough was 262.

The number of deaths registered was 158—76 males and 82 females. The number of deaths of persons resident in the County Borough was 133.

Tuberculosis caused 9 deaths, all of which were from tuberculosis of the respiratory system.

Fifteen deaths were due to malignant neoplasms.

There were 7 deaths from bronchitis and 8 from pneumonia.

There were 6 accidental deaths registered, one of which was from gas poisoning, one from burns and 2 from drowning.

Among the deaths of infants under one year, one was due to whooping cough, 1 to bronchial pneumonia, 3 to prematurity, 1 to congenital malformation, 3 to birth injury, one to meconium ileus and 2 to atelectasis.

Twelve of the deaths recorded during the week for the County Borough were those of children under one year of age, 9 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 68.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 17th January, 1953, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 4 Vol. LXXX. WEEK ENDED SATURDAY, 24th JANUARY, 1953. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 278—147 boys and 131 girls, while the number of births to mothers normally resident in the County Borough was 219.

The number of deaths registered was 141—76 males and 65 females. The number of deaths of persons resident in the County Borough was 117.

Tuberculosis caused 4 deaths, all of which were from tuberculosis of the respiratory system.

Sixteen deaths were due to malignant neoplasms.

There were 8 deaths from bronchitis and 7 from pneumonia.

There were 2 accidental deaths registered, one of which was from drowning.

Among the deaths of infants under one year, one was due to bronchitis, 2 to pneumonia, 2 to congenital malformation, 1 to pneumococcal meningitis and 1 to respiratory failure at birth.

Seven of the deaths recorded during the week for the County Borough were those of children under one year of age, 4 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 67.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 24th January, 1953, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 8 Vol. LXXX. WEEK ENDED SATURDAY, 21st FEBRUARY, 1953. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 289—158 boys and 131 girls, while the number of births to mothers normally resident in the County Borough was 217.

The number of deaths registered was 149—81 males and 68 females. The number of deaths of persons resident in the County Borough was 128.

Tuberculosis caused 6 deaths, 5 of which were from tuberculosis of the respiratory system and one from tuberculous meningitis.

Eleven deaths were due to malignant neoplasms.

There were two deaths from influenza, 10 from pneumonia and 4 from bronchitis.

There was one accidental death registered due to burns.

Among the deaths of infants under one year, 2 were due to pneumonia, 2 to congenital malformations, one to atelectasis, one to convulsions, one to meningococcal meningitis, one to haemorrhagic disease of newborn, one to pneumococcal peritonitis and one to gastro enteritis.

Ten of the deaths recorded during the week for the County Borough were those of children under one year of age, 4 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 76.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 21st February, 1953, for the Principal Towns with similar particulars for BELFAST and DERRY.

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 9 Vol. LXXXX. WEEK ENDED SATURDAY, 28th FEBRUARY, 1953. PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 310—169 boys and 141 girls, while the number of births to mothers normally resident in the County Borough was 239.

The number of deaths registered was 135—81 males and 54 females. The number of deaths of persons resident in the County Borough was 107.

Tubercu osis caused 8 deaths, 7 of which were from tuberculosis of the respiratory system and one from tuberculosis of the hip.

Thirteen deaths were due to malignant neoplasms.

There was one death from influenza, 5 from pneumonia and 6 from bronchitis.

There were 3 accidental deaths registered, one of which was due to drowning, one to accidental suffocation and one to crushing by an excavator.

Among the deaths of infants under one year, 3 were due to pneumonia, 1 to congenital malformation, one to injury at birth, one to debility, one to purulent meningitis, one to accidental suffocation, one to sepsis neonatorum and one to cardio-respiratory failure.

Ten of the deaths recorded during the week for the County Borough were those of children under one year of age, 4 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 64.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 28th February, 1953, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 10 Vol. LXXXX. WEEK ENDED SATURDAY, 7th MARCH, 1953.

PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 325—175 boys and 150 girls, while the number of births to mothers normally resident in the County Borough was 267.

The number of deaths registered was 155—86 males and 69 females. The number of deaths of persons resident in the County Borough was 118.

Tuberculosis caused 5 deaths, all of which were from tuberculosis of the respiratory system.

Sixteen deaths were due to malignant neoplasms.

There were 4 deaths from influenza, 5 from pneumonia and 5 from bronchitis.

Among the deaths of infants under one year, 2 were due to pneumonia, 2 to injury at birth, one to congenital malformations, one to kernicterus, one to asphyxia neonatorum, one to atelectasis and one to prematurity.

Nine of the deaths recorded during the week for the County Borough were those of children under one year of age, 7 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 67.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 7th March, 1953, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 11 Vol. LXXXX. WEEK ENDED SATURDAY, 14th MARCH, 1953. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 337—181 boys and 156 girls, while the number of births to mothers normally resident in the County Borough was 278.

The number of deaths registered was 159—69 males and 90 females. The number of deaths of persons resident in the County Borough was 131.

Tuberculosis caused 11 deaths, 10 of which were from tuberculosis of the respiratory system and one from tuberculosis of rectum.

Seventeen deaths were due to malignant neoplasms.

There were 2 deaths from influenza, 8 from pneumonia and 6 from bronchitis.

Among the deaths of infants under one year, 4 were due to pneumonia, 2 to injury at birth, 2 to whooping cough, one to congenital malformation and one to cardiac failure.

Ten of the deaths recorded during the week for the County Borough were those of children under one year of age, 3 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 71.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 13 Vol. LXXXX. WEEK ENDED SATURDAY, 28th MARCH, 1953. PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 399—215 boys and 184 girls, while the number of births to mothers normally resident in the County Borough was 301.

The number of deaths registered was 139—71 males and 68 females. The number of deaths of persons resident in the County Borough was 119.

Tuberculosis caused 6 deaths, 5 of which were from tuberculosis of the respiratory system and one from tuberculous meningitis.

Fifteen deaths were due to malignant neoplasms.

There were 11 deaths from pneumonia and 3 from bronchitis.

There were 2 accidental deaths registered, one of which was due to a motor vehicle transport accident and one to drowning.

Among the deaths of infants under one year, 5 were due to pneumonia, 3 to congenital malformation, 2 to injury at birth, one to gastro-enteritis, one to intra-uterine infection, one to prematurity, and one to atelectasis.

Fourteen of the deaths recorded during the week for the County Borough were those of children under one year of age, 7 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 66.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 28th March, 1953, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 15 Vol. LXXXX. WEEK ENDED SATURDAY, 11th APRIL, 1953.

PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 318—150 boys and 168 girls, while the number of births to mothers normally resident in the County Borough was 244.

The number of deaths registered was 132—65 males and 67 females. The number of deaths of persons resident in the County Borough was 105.

Tuberculosis caused 8 deaths, 6 of which were from tuberculosis of the respiratory system, one from tuberculous meningitis and one from tuberculosis of the ankle.

Twelve deaths were due to malignant neoplasms.

There were 6 deaths from pneumonia, 3 from bronchitis and one from influenza.

There were 7 accidental deaths registered, 2 of which were due to motor vehicle transport accidents, one to carbon monoxide poisoning and one to burns.

Among the deaths of infants under one year, 4 were due to pneumonia, 2 to congenital malformation, one to haemorrhagic disease of newborn and 3 to atelectasis.

Ten of the deaths recorded during the week for the County Borough were those of children under one year of age, 5 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 61.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 11th April, 1953, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 16 Vol. LXXX. WEEK ENDED SATURDAY, 18th APRIL, 1953.

PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 326—172 boys and 154 girls, while the number of births to mothers normally resident in the County Borough was 247.

The number of deaths registered was 146—87 males and 59 females. The number of deaths of persons resident in the County Borough was 108.

Tuberculosis caused 5 deaths, 4 of which were from tuberculosis of the respiratory system, and one from mesenteric tuberculosis.

Eight deaths were due to malignant neoplasms.

There were 8 deaths from pneumonia, and 4 from bronchitis.

There were 5 accidental deaths registered, 2 of which were due to drowning.

Among the deaths of infants under one year, 4 were due to congenital malformation, 2 to pneumonia, one to haemolytic disease of newborn, one to atelectasis, one to pulmonary congestion, one to septicaemia and one to injury at birth.

Twelve of the deaths recorded during the week for the County Borough were those of children under one year of age, 8 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 67.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 18th April, 1953, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 19 Vol. LXXXX. WEEK ENDED SATURDAY, 9th MAY, 1953

PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, *Dún Laoghaire* Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 311—168 boys and 143 girls, while the number of births to mother normally resident in the County Borough was 237.

The number of deaths registered was 134—75 males and 59 females. The number of deaths of persons resident in the County Borough was 110.

Tuberculosis caused 4 deaths, all of which were from tuberculosis of the respiratory system.

Nineteen deaths were due to malignant neoplasms.

There were 8 deaths from pneumonia, 3 from bronchitis and one from influenza.

There were 2 accidental deaths registered, both of which were due to transport accidents.

Among the deaths of infants under one year, 7 were due to congenital malformation, 4 to pneumonia, 4 to atelectasis, 3 to prematurity, 2 to injury at birth, 2 to kernicterus, one to whooping-cough, one to measles, one to meningitis and one to nephrosis.

Twenty-six of the deaths recorded during the week for the County Borough were those of children under one year of age, 18 of whom were under one month old. Death of persons aged 65 years and upwards numbered 49.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 9th May, 1953, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 22 Vol. LXXXX. WEEK ENDED SATURDAY, 30th MAY, 1953 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 393—203 boys and 190 g rls, while the number of births to mothers normally resident in the County Borough was 302.

The number of deaths registered was 99—54 males and 45 females. The number of deaths of persons resident in the County Borough was 83.

Tuberculosis caused 6 deaths, 4 of which were from tuberculosis of the respiratory system, one from tuberculous meningitis and one from tuberculosis of the intestines.

Eleven deaths were due to malignant neoplasms.

There were 4 deaths from bronchitis, and one from pneumonia.

There were 3 accidental deaths registered, one of which was due to drowning and one to a transport accident.

Among the deaths of infants under one year, 3 were due to congenital malformation, one to prematurity, one to atelectasis, one to convulsions, one to haemolytic disease of newborn, and one to pontine haemorrhage.

Nine of the deaths recorded during the week for the County Borough were those of children under one year of age, 6 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 42.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 30th May, 1953, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 23 Vol. LXXXX. WEEK ENDED SATURDAY, 6th JUNE, 1953 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 374—205 boys and 169 girls, while the number of births to mothers normally resident in the County Borough was 302.

The number of deaths registered was 84—41 males and 43 females. The number of deaths of persons resident in the County Borough was 66.

Tuberculosis caused 5 deaths, all of which were from tuberculosis of the respiratory system.

Eleven deaths were due to malignant neoplasms.

There were 3 deaths from bronchitis, and two from pneumonia.

There were 2 accidental deaths registered, one of which was due to somnambulism and one to a transport accident.

Among the deaths of infants under one year, 2 were due to congenital malformation, 2 to prematurity, one to atelectasis, one to pneumonia, one to meningitis, one to bronchitis, one to injury at birth and one to cardiac failure.

Eleven of the deaths recorded during the week for the County Borough were those of children under one year of age, 8 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 31.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 6th June, 1953, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chláraitheóir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 24 Vol. LXXXX. WEEK ENDED SATURDAY, 13th JUNE, 1953

PRINTED BY THE GOVERNMENT PRINTING OFFICE

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 419—212 boys and 207 girls, while the number of births to mothers normally resident in the County Borough was 345.

The number of deaths registered was 144—70 males and 74 females. The number of deaths of persons resident in the County Borough was 110.

Tuberculosis caused 3 deaths, all of which were from tuberculosis of the respiratory system.

Nineteen deaths were due to malignant neoplasms.

There were 4 deaths from pneumonia and 3 from bronchitis.

There were 3 accidental deaths registered.

Among the deaths of infants under one year, 4 were due to congenital malformation, and one to pneumonia.

Seven of the deaths recorded during the week for the County Borough were those of children under one year of age, all of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 60.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 13th June, 1953, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 28 Vol. LXXXX. WEEK ENDED SATURDAY, 11th JULY, 1953 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 269—133 boys and 136 girls, while the number of births to mothers normally resident in the County Borough was 207.

The number of deaths registered was 113—52 males and 61 females. The number of deaths of persons resident in the County Borough was 96

Tuberculosis caused 2 deaths, both of which were from tuberculosis of the respiratory system.

Twenty-one deaths were due to malignant neoplasms

There were 4 deaths from pneumonia and 3 from bronchitis.

There were 3 accidental deaths registered, all of which were due to transport accidents.

Among the deaths of infants under one year, 4 were due to prematurity, 3 to congenital malformation, 2 to pneumonia, one to injury at birth, one to atelectasis and one to empyema.

Twelve of the deaths recorded during the week for the County Borough were those of children under one year of age, 10 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 48

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 11th July, 1953, for the Principal Towns with similar particulars for BELFAST and DERRY

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 29 Vol. LXXXX. WEEK ENDED SATURDAY, 18th JULY, 1953 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 340—159 boys and 181 girls, while the number of births to mothers normally resident in the County Borough was 246.

The number of deaths registered was 91—44 males and 47 females. The number of deaths of persons resident in the County Borough was 72.

Tuberculosis caused 2 deaths, both of which were from tuberculosis of the respiratory system.

Fourteen deaths were due to malignant neoplasms.

There was one death from pneumonia and 2 from bronchitis.

There were 5 accidental deaths registered, 2 of which were due to transport accidents and 2 to drowning.

Among the deaths of infants under one year, one was due to scalds and 2 to injury at birth.

Three of the deaths recorded during the week for the County Borough were those of children under one year of age, 2 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 30.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 30 Vol. LXXXX. WEEK ENDED SATURDAY, 25th JULY, 1953 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 281—164 boys and 117 girls, while the number of births to mothers normally resident in the County Borough was 206.

The number of deaths registered was 120—65 males and 55 females. The number of deaths of persons resident in the County Borough was 95.

Tuberculosis caused 4 deaths, all of which were from tuberculosis of the respiratory system.

Seventeen deaths were due to malignant neoplasms.

There were 4 deaths from pneumonia and 2 from bronchitis.

There were 8 accidental deaths registered, 3 of which were due to transport accidents and one to drowning.

Among the deaths of infants under one year, 3 were due to atelectasis, 2 to broncho-pneumonia, one to malformation, one to thrush, one to burns and one to injury at birth.

Nine of the deaths recorded during the week for the County Borough were those of children under one year of age, 7 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 53.

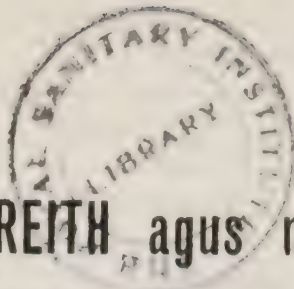

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 25th July, 1953, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS FOR THE PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 32 Vol. LXXXX. WEEK ENDED SATURDAY, 8th AUGUST, 1953 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 275—146 boys and 129 girls, while the number of births to mothers normally resident in the County Borough was 205.

The number of deaths registered was 118—55 males and 63 females. The number of deaths of persons resident in the County Borough was 87.

Tuberculosis caused 4 deaths, all of which were due to tuberculosis of the respiratory system.

Fourteen deaths were due to malignant neoplasms.

There were 6 deaths from pneumonia and 8 from bronchitis.

Among the deaths of infants under one year, 2 were due to pneumonia, one to convulsions, one to asphyxia neonatorum, one to congenital malformation and one to septicaemia.

Six of the deaths recorded during the week for the County Borough were those of children under one year of age, 3 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 51.

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 33 Vol. LXXXX. WEEK ENDED SATURDAY, 15th AUGUST, 1953 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 376—189 boys and 187 girls, while the number of births to mothers normally resident in the County Borough was 304.

The number of deaths registered was 85—44 males and 41 females. The number of deaths of persons resident in the County Borough was 68.

Tuberculosis caused 3 deaths, 2 of which were due to tuberculosis of the respiratory system and one to tuberculous meningitis.

Eleven deaths were due to malignant neoplasms.

There were 2 deaths from pneumonia and 3 from bronchitis.

There were three accidental deaths registered, two of which were due to falls.

Among the deaths of infants under one year, one was due to pulmonary congestion, one to congenital malformation and one to injury at birth.

Three of the deaths recorded during the week for the County Borough were those of children under one year of age, 2 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 35.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 35 Vol. LXXXX. WEEK ENDED SATURDAY, 29th AUGUST, 1953 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 251—132 boys and 119 girls, while the number of births to mothers normally resident in the County Borough was 194.

The number of deaths registered was 102—48 males and 54 females. The number of deaths of persons resident in the County Borough was 77.

Tuberculosis caused one death, which was due to tuberculosis of the respiratory system.

Twelve deaths were due to malignant neoplasms.

There were 2 deaths from pneumonia and 3 from bronchitis.

There were 2 accidental deaths registered, one of which was due to a transport accident.

Among the deaths of infants under one year, 4 were due to atelectasis, 4 to prematurity, 2 to haemolytic disease, one to pneumonia and one to birth injury.

Twelve of the deaths recorded during the week for the County Borough were those of children under one year of age, all of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 31.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 29th August, 1953, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 36 Vol. LXXXX. WEEK ENDED SATURDAY, 5th SEPTEMBER, 1953 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 318—176 boys and 142 girls, while the number of births to mothers normally resident in the County Borough was 234.

The number of deaths registered was 74—40 males and 34 females. The number of deaths of persons resident in the County Borough was 56.

Tuberculosis caused 3 deaths, all of which were due to tuberculosis of the respiratory system.

Thirteen deaths were due to malignant neoplasms.

There were 3 deaths from pneumonia and one from bronchitis.

There were 3 accidental deaths registered, all of which were due to transport accidents.

Among the deaths of infants under one year, one was due to bronchopneumonia, one to congenital malformation, one to asphyxia neonatorum, one to injury at birth and one to prematurity.

Five of the deaths recorded during the week for the County Borough were those of children under one year of age, 3 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 27.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 5th September, 1953, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 37 Vol. LXXXX. WEEK ENDED SATURDAY, 12th SEPTEMBER, 1953 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 309—165 boys and 144 girls, while the number of births to mothers normally resident in the County Borough was 233.

The number of deaths registered was 121—66 males and 55 females. The number of deaths of persons resident in the County Borough was 94.

Tuberculosis caused 4 deaths, all of which were due to tuberculosis of the respiratory system.

Twenty-one deaths were due to malignant neoplasms.

There were 2 deaths from pneumonia and one from bronchitis.

There were 7 accidental deaths registered, 2 of which were due to transport accidents.

Among the deaths of infants under one year, 4 were due to atelectasis, 2 to congenital malformations, one to gastro-enteritis and one to asphyxia neonatorum.

Eight of the deaths recorded during the week for the County Borough were those of children under one year of age, 6 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 54.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 39 Vol. LXXX. WEEK ENDED SATURDAY, 26th SEPTEMBER, 1953 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 283—143 boys and 140 girls, while the number of births to mothers normally resident in the County Borough was 210.

The number of deaths registered was 101—51 males and 50 females. The number of deaths of persons resident in the County Borough was 82.

Tuberculosis caused 3 deaths, all of which were due to pulmonary tuberculosis.

Thirteen deaths were due to malignant neoplasms.

There were 3 deaths from pneumonia and 2 from bronchitis.

There were 4 accidental deaths registered, one of which was due to a transport accident.

Among the deaths of infants under one year, 3 were due to congenital malformations, 3 to gastro-enteritis, 3 to injuries at birth, 3 to broncho-pneumonia, one to acute neo-natal infection, one to haemolytic disease, one to prematurity and one to congenital debility.

Sixteen of the deaths recorded during the week for the County Borough were those of children under one year of age, 10 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 44.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 26th September, 1953, for the Principal Towns with similar particulars for BELFAST and DERRY

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 287—160 boys and 127 girls, while the number of births to mothers normally resident in the County Borough was 217.

The number of deaths registered was 100—51 males and 49 females. The number of deaths of persons resident in the County Borough was 84.

Tuberculosis caused one death, which was due to tuberculous adenitis.

Eleven deaths were due to malignant neoplasms.

There were 4 deaths from pneumonia and 5 from bronchitis.

There were 3 accidental deaths registered, 2 of which were due to transport accidents.

Among the deaths of infants under one year, 4 were due to prematurity, 3 to congenital malformations, one to gastro-enteritis and one to bronchitis.

Nine of the deaths recorded during the week for the County Borough were those of children under one year of age, 7 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 41.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 43 Vol. LXXXX. WEEK ENDED SATURDAY, 24th OCTOBER, 1953 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 287—147 boys and 140 girls, while the number of births to mothers normally resident in the County Borough was 239.

The number of deaths registered was 137—83 males and 54 females. The number of deaths of persons resident in the County Borough was 104.

Tuberculosis caused 8 deaths, 7 of which were due to tuberculosis of the respiratory system, and one to tuberculous enteritis.

Twenty-six deaths were due to malignant neoplasms.

There were 6 deaths from pneumonia and 2 from bronchitis.

There were 5 accidental deaths registered, 2 of which were due to transport accidents, and one to drowning.

Among the deaths of infants under one year, 2 were due to broncho-pneumonia, one to gastro-enteritis, one to congenital heart disease, one to congenital debility and one to asphyxia.

Six of the deaths recorded during the week for the County Borough were those of children under one year of age. Deaths of persons aged 65 years and upwards numbered 58.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 24th October, 1953, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS FOR THE PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 46 Vol. LXXXX. WEEK ENDED SATURDAY, 14th November, 1953 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 286—147 boys and 139 girls, while the number of births to mothers normally resident in the County Borough was 229.

The number of deaths registered was 116—59 males and 57 females. The number of deaths of persons resident in the County Borough was 99.

Tuberculosis caused 3 deaths, one of which was due to tuberculosis of the respiratory system, one to tuberculous meningitis and one to tuberculosis of the spine.

Eighteen deaths were due to malignant neoplasms.

There were 4 deaths from bronchitis, one from influenza and one from pneumonia.

There were 4 accidental deaths registered, 2 of which were due to transport accidents.

Among the deaths of infants under one year, 4 were due to congenital malformation, one to pneumonia, one to gastro-enteritis, one to meconium ileus, one to haemolytic disease and one to injury at birth.

Nine of the deaths recorded during the week for the County Borough were those of children under one year of age, 4 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 54.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 14th November, 1953, for the Principal Towns with similar particulars for BELFAST and DERRY.

No. 49 Vol. LXXXX. WEEK ENDED SATURDAY, 5th December, 1953 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 291—150 boys and 141 girls, while the number of births to mothers normally resident in the County Borough was 227.

The number of deaths registered was 125—61 males and 64 females. The number of deaths of persons resident in the County Borough was 100.

Tuberculosis caused 7 deaths, all of which were due to tuberculosis of the respiratory system.

Nineteen deaths were due to malignant neoplasms.

There were 5 deaths from bronchitis, and 3 from pneumonia.

There was one accidental death registered, which was due to a transport accident.

Among the deaths of infants under one year, 3 were due to congenital malformation, and two to prematurity.

Five of the deaths recorded during the week for the County Borough were those of children under one year of age, 3 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 64.

No. 52 Vol. LXXXX. WEEK ENDED SATURDAY, 26th December, 1953 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 178—87 boys and 91 girls, while the number of births to mothers normally resident in the County Borough was 133.

The number of deaths registered was 78—36 males and 42 females. The number of deaths of persons resident in the County Borough was 72.

Tuberculosis caused one death, which was due to tuberculosis of the respiratory system.

Eleven deaths were due to malignant neoplasms.

There were 8 deaths from bronchitis, and 2 from pneumonia.

There were 5 accidental deaths registered, 3 of which were due to transport accidents and one to asphyxia.

There was one suicide.

Among the deaths of infants under one year, one was due to congenital malformation and one to gastro-enteritis.

Two of the deaths recorded during the week for the County Borough were those of children under one year of age, one of whom was under one month old. Deaths of persons aged 65 years and upwards numbered 33.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 26th December, 1953, for the Principal Towns with similar particulars for BELFAST and DERRY

PRINCIPAL TOWNS	POPULATION 1951	BIRTHS	DEATHS	CAUSED BY
